## PROFESSIONAL SUMMARY

Graduate Engineer specializing in AI & ML with a strong execution background in Python Full-Stack Development. Proficient in building scalable applications, architecting REST APIs with Django, and integrating intelligent features like Agentic AI recommendation systems and secure transaction workflows.

## PROFESSIONAL EXPERIENCE

Python Full Stack Intern | KodNest 02/2026 – 06/2026  
BENGALURU

- Developed full-stack web application ("Meal Buddy") using Agile methodologies.
- Built backend servers handling relational ORM data schemas via Django and DRF.
- Secured application using Token-Based Authentication and password hashing.
- Configured Django media storage and Pillow library for asset rendering.

## PROJECTS

**Meal Buddy: Full-Stack E-Commerce Platform & AI Chatbot (Django, DRF, JavaScript, SQLite)** 2026

- Developed a full-stack platform featuring dynamic restaurant cards, persistent cart state aggregation, and checkout systems.
- Integrated a secure third-party payment gateway modal utilizing the Razorpay API Sandbox environment for live transactions.
- Architected "AI Food Buddy," an Agentic AI recommendation interface utilizing NLP intent recognition to query database items via chat.
- Managed strict frontend-backend state synchronization to handle dynamic mathematical aggregations (e.g., real-time cart total computing)

**Customer Segmentation Using ML (Python, Scikit-learn, Pandas)** 2025

- Built a data-driven customer segmentation model using K-Means clustering algorithms.
- Preprocessed and analyzed customer datasets using Pandas, NumPy, and Scikit-learn to yield actionable marketing insights.

**Eye-Controlled Mouse Cursor (Python, OpenCV, Dlib)** 2024

- Developed a hands-free mouse control system using eye-tracking technology to assist user accessibility.
- Enabled real-time cursor movement and click actions through facial landmark and eye gaze detection.
- Improved tracking accuracy through user calibration algorithms and dynamic lighting optimization.

## Technical skills

- **Programming Languages:** Python, JavaScript, SQL
- **Frameworks & Libraries:** Django, Django REST Framework, React.js, Pandas, NumPy, Scikit-learn, Pillow
- **Databases:** MySQL, SQLite, PostgreSQL
- **Tools & Platforms:** Git, GitHub, VS Code, Cursor, Postman (API Testing), Windows
- **Core Competencies:** Data Structures & Algorithms, Machine Learning, Agentic AI, Token Authentication

## Education

**B.E in Computer Science (AI & ML), Rao Bahadur Y. Mahabaleshwarappa Engineering College** 2022 – 2026  
**CGPA:** 8.3 / 10.0 (**Percentage:** 80.84%) Ballari,India

**PUC(PCMC), Sri Venkateswara pu college** 2020 – 2022  
**Percentage:** 83.67 Raichur,India

**SSLC, vidhya bharati english medium high school** 2019 – 2020  
**Percentage:** 71.84 Raichur,India
